« The Calais Dragon »

Live the experience of a trip aboard the Calais Dragon

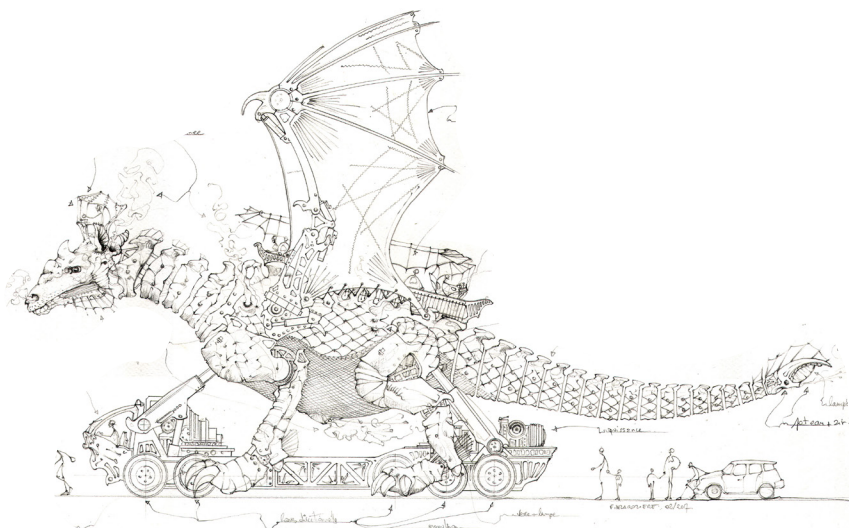

From its imposing height (10 metres) and length (25 metres), the Calais Dragon keeps watch over the town.

How about a ride on board? Climb along the dragon's tail, on to the covered viewing platform built into its back, and off you go on an unforgettable «dragon-paced» 20-minute journey.

As a Dragon of the sea, as well as of the earth, wind and fire, it spits out flames, smoke and water in various forms.

Don't be misled by its imposing size: the Dragon is capable of lying down, getting up, rearing on its hind legs, running up to 4 km/h and beating its wings !

The essence of the approach (inherited from the company La Machine in Nantes) lies in movement. From the moment a scene comes into play, a mixture of magic and emotion takes over, creating a new universal language. The Dragon's adventures on the sea front bring a fresh outlook on the town of Calais, and sweep you up into the extravagantly imaginary world of creatures who occupy the depths of Northern seas, product of the artist François Delaroziere's creative mind.
